My friend diagnosed with Limfoma Cancer stage 4. We are foreign worker from Indonesia.

At first he was being treated at Khmer Soviet Friendship Hospital for 4 months (Dec 2021 - March 2022), but there is no good improvement until the oncology department doctor told us to go back home, they are not allow us to stay in hospital even if I told them that I'm willing to pay for the room and the paliative treatment. At that time my friend already lose his movement ability from chest to leg. The only part of his body that he can move are his left hand and his head.

I was frustated to seek for medical center that I can admit him into, finally I found **MUCH Mobile Healthcare, Cambodia** and I contacted Ms Phirum to make appointment to admit my friend into her clinic, Thanks God Ms Phirum allowed him to be treated (paliative treatment) at her clinic. The nurse, doctor and Ms Phirum herself very professional in their act, they really care on their patient, unlike nurse in Khmer Soviet Hospital who don't really care about their patient!

My friend was treated for almost 3 weeks at Much Mobile Healthcare before he passed away on 1st May 2022. I had bring him to many hospital and clinic in Cambodia (Sihanoukville & Phnom Penh), but the best and the most professional treatment and care is at Much Mobile Healthcare!

I really appreciated all the hardwork from Ms Phirum, MMH doctors, MMH nurses, their love and care towards their patient is real and sincere!!

Thank you so much Ms Phirum, Doctors, and Nurses in Much Mobile Healthcare for your care and love during the time **Zicco Lie** admitted there!

A very deep and warm thank to the whole staff of this small clinic. You are lovely people and very professional as well. I could not have found better for my mother. You gave to her more than medical care. You gave love and human warmth. Thank you so much.

Much Mobile Healthcare Co., Ltd

Owner

friendly, helpful, and trustworthy

"My uncle is now so much better after I started MUCH home care. He can talk more and even tell jokes. I am happy with MUCH' service. Their nurses are friendly, helpful and trustworthy. MUCH assessed my uncle carefully and they suggested the best service for us. First I thought we would need 12 hour service, but after MUCH' assessment, they said it was not necessary to have a long hour service. Now we use 2 hour service called Life Support Plan. It's really supporting my uncle and even us, his family."

-Mr. Huot Pengly

MUCH, that is the best choice

"I had a big surgery for a jaw cancer. During my hospitalization abroad, I had a feeding tube, and I breathed through tracheotomy. I could do nothing. However, MUCH served me everything such as bathing and feeding. I am more than happy with MUCH."

Ms. Khun Punhreasey (Patient)

"With MUCH' service, we were able to feel very comfortable because we didn't disturb our children to look after her abroad for a surgery. We continued MUCH service for another month after we came back to Cambodia since my wife needed special care in a long term. She is getting much better now. MUCH, that is the best choice. If I had not chosen a right service, probably we wouldn't have today."

Mr. Sokhan Chroeng (Patient's spouse)
